Education

Gyanmanjari Innovative University

Bachelor of Technology in Information Technology

Aug. 2023 – May 2027

Bhavnagar, Gujarat

Relevant Coursework

- Machine Learning
- Database Management
- NLP
- Python Programming
- Data Structures
- Computer Vision
- Statistics and Probability

Experience

Su-kEm Tech Lab

jun. 2025 – july. 2025

Python and Django Backend Developer Intern

Remote

- Developed and maintained RESTful APIs using Django REST Framework, reducing average API response time by 30 percent through query optimization and caching strategies.
- Implemented data preprocessing pipelines in Python to clean and transform raw datasets for downstream machine learning model consumption.
- Collaborated with a 4-member team using Git version control to build scalable backend modules, following MVC architecture and writing unit tests with pytest.
- Integrated PostgreSQL database models and wrote complex ORM queries, improving data retrieval efficiency for analytics dashboards.

iKraft Solutions

Jun. 2024 – july. 2024

Java Developer Intern

on-site

- Built and tested Java-based backend modules using object-oriented programming principles, reducing code redundancy by 25 percent through design pattern implementation.
- Developed data ingestion and transformation utilities in Java to process structured datasets, supporting reporting and analytics workflows.
- Participated in Agile sprint cycles, contributed to daily standups, and delivered features on schedule across 3 sprint cycles.
- Wrote JUnit test cases achieving 85 percent code coverage, ensuring stability of production-grade backend services.

Projects

AI Resume Intelligence Platform | FastAPI, Python, SpaCy, EasyOCR, Sentence Transformers, HTML/CSS | [GitHub](#) 2026

- Developed an AI-powered resume analysis platform that extracts candidate information, skills, education, and experience from PDF and image resumes using SpaCy NLP and EasyOCR.
- Implemented ATS score calculation, resume strength analysis, missing skill detection, and AI-generated feedback to help improve resume quality.
- Built a FastAPI-based web application with an interactive dashboard for resume screening, candidate ranking, and job-resume matching.
- Integrated Sentence Transformers for semantic similarity matching between resumes and job descriptions, enabling intelligent candidate evaluation and ranking.

RAG-Based Document Q&A Chatbot | Python, LangChain, FAISS, Gemini API, Streamlit | [GitHub](#)

2026

- Developed a Retrieval-Augmented Generation (RAG) chatbot that enables users to upload PDF documents and ask natural language questions with context-aware responses.
- Implemented semantic document retrieval using FAISS vector database and HuggingFace embeddings for efficient similarity search across document chunks.
- Integrated Google Gemini 2.5 Flash API with LangChain-based text processing pipeline to generate accurate answers grounded in retrieved document context.
- Built an interactive Streamlit web application supporting PDF upload, text extraction, chunking, vector indexing, and real-time document question answering.

LostnFound | React.js, TypeScript, Firebase Firestore, Firebase Storage, Flask, Tailwind CSS | [GitHub](#)

2024

- Developed a full-stack Lost & Found portal using React.js and TypeScript, enabling users to report, search, and manage lost or found items with image uploads.
- Integrated Firebase Firestore and Firebase Storage for real-time data management, secure cloud image storage, and CRUD operations on item records.
- Implemented authentication, category-based filtering, search functionality, and LocalStorage fallback support, while designing a responsive UI with Tailwind CSS.

Technical Skills

Languages: Python, Java, SQL, HTML, CSS, JavaScript
AI and ML: Pandas, NumPy, Matplotlib, EasyOCR, TensorFlow, Keras, Scikit-learn, PyTorch, OpenCV, SpaCy
Frameworks and Tools: Django, FastAPI, Flask, LangChain, n8n, Git
Databases: PostgreSQL, MySQL, SQLite, FAISS (Vector Store)
Developer Tools: VS Code, Jupyter Notebook, Google Colab, GitHub

Certifications

Anthropic	2026
<i>AI Fluency: Framework & Foundations (LLM Architecture, AI Systems Design, Generative AI Applications)</i>	
CodeWithHarry	2026
<i>Data Science Course (Python, NumPy, Pandas, Matplotlib, Data Analysis, Machine Learning Fundamentals)</i>	
Anthropic	2026
<i>Claude Code in Action (LLM-based Applications, AI Agent Workflows, Claude API)</i>	
Anthropic	2026
<i>Claude 101 (Prompt Engineering, Responsible AI Development, AI-Assisted Software Development)</i>	
simplilearn	2025
<i>Python for Data Science (Data Analysis, Data Preprocessing, EDA, Data Visualization with Pandas and NumPy)</i>
